CARBON CAPTURE & STORAGE

HYDROGEN PRODUCTION

LIQUEFACTION & CRYOGENIC

ZERO FLARING

ENERGY RECOVERY

PROJECT DEVELOPMENT

~~CO2~~

DRIVING THE ENERGY TRANSITION
INNOVATIVE MODULAR SOLUTION PROVIDER

FOR A SUSTAINABLE FUTURE

OUR PRODUCTS

OUR SKILLS

CARBON CAPTURE AND STORAGE

Flue Gas Treatment and Temperature Control
Amine-base CO2 Capture Absorption Technology
Treatment and Purification of Captured CO2
Liquefaction of Purified Captured CO2

HYDROGEN PRODUCTION

Modular Steam Methane Reforming (SMR) Units
Hydrogen Purification and Dehydration
Blue Hydrogen through Carbon Capture Technology
Green Hydrogen through Gasification Technology

LIQUEFACTION AND CRYOGENICS

Low-Temperature Gas Fractionation / Purification
Cryogenic Process Skids Development
Modular Natural Gas Liquefaction (LNG) Units
CO2 Liquefaction Units

ZERO FLARING

Associated Petroleum Gas Gathering / Compression
Associated Petroleum Gas Treatment
LPG / Condensate Recovery and Storage
Flare Gas Recovery Units in Processing Plants

ENERGY RECOVERY

Expander-Generator for Gas Let-Down Stations (With Partner)
Heat Recovery from Industrial Plants
ORC Power Generation from Waste Heat Streams (With Partner)
Waste Material Gasification / Power Generation

PROJECT DEVELOPMENT

Conceptual Development
Feasibility Study
Project Financing for Selected Projects
Partial Investment in Selected Projects

TECHNOLOGY

*R&D, INNOVATIVE SOLUTIONS,
LICENSE MANAGEMENT*

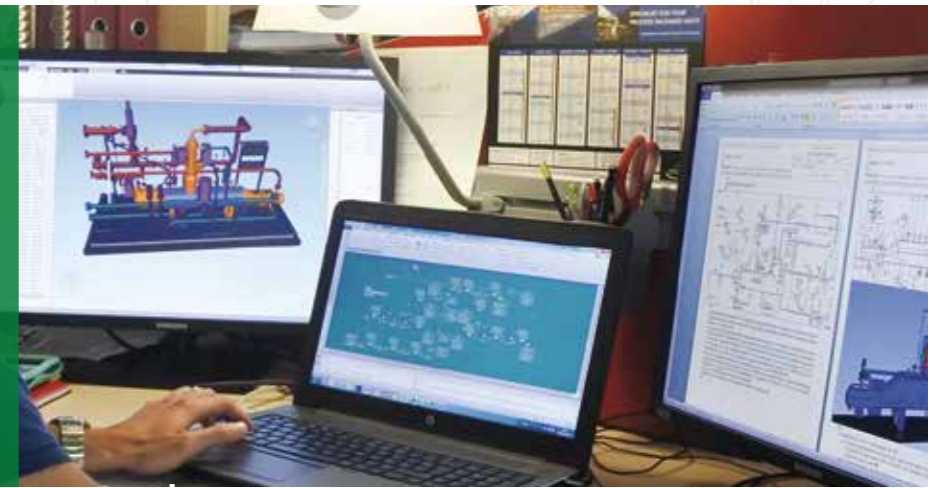

Developing innovative solutions responding to the new requirements, either on company know-how, R&D investment, or license agreements with technological partners for the key elements.

ENGINEERING

*FEED, DETAIL, SUPERVISION,
COMMISSIONING*

Providing engineering services from basic design up to start-up and after-sale services, through the different expertise departments; PROCESS, MECHANICAL, ELECTRICAL, I&C, SAFETY, SUPERVISION, COMMISSIONING and START-UP.

FABRICATION

*MANUFACTURING, PROCUREMENT,
ASSEMBLY, TESTING*

Providing modular solutions thanks to well-equipped distributed workshops in; FRANCE - POLAND - CHINA - ALGERIA In conformity with the international codes and standards relevant to the oil, gas, and energy industry.

DEVELOPMENT

*FEASIBILITY STUDY, PARTIAL
INVESTMENT, PROJECT FINANCING*

Supporting the selected projects from the conceptual phase up to the FID, by providing feasibility study, and investment analysis. Developing the targetted projects by financing provision or partial investment.
